Great! That is wonderful! Thanks for the update & for checking in with HQ. Feel free to rename any document to fit the standard.

Attached is the NHPA document ready to convert to pdf.

I will work on getting the Class I Permit and Fact Sheet ready for you by tomorrow just so you aren't waiting on me for anything & slowing down your momentum.

If you need to talk to me in person, please feel free to give me a call on my cell at Ex. 6 Personal Privacy (PP) I am telecommuting today and tomorrow.

Valois

Subject: DB 508 task

Valois,

I completed one file (Class II Application) 508 standard and saving it in my thumb drive. I do have to change the files name to a 20 character or less with a common and readable subject to meet the 508. I will explain when you get back.

I talked to the Senior Web Content Strategist from HQ this morning. Christine stated that some of the old paperwork that are scanned, we may encounter problems and we need to do the best we can to get it close to 508. As long the document is readable, we should be good. They are also having the same issues in making documents 508 compliant. According to what she is looking for in a document, the way that I am doing it is the correct way. I do not see any problems in meeting the deadline for next week. I will keep you and Douglas informed.
